

Relocation of OSARTIS GmbH to Münster „Auf der Beune 101“

June 9th, 2022

After a construction phase of around a year, end of May the medical device company **OSARTIS GmbH** moved into its **new premises** on the 13,000 m² property (Auf der Beune 101, 64839 Münster) in the development area “Am Seerich”.

In the first step, the office workplaces were relocated to the new building. The relocation of the laboratories, warehouse and production will follow in several steps. OSARTIS plans to start production at the new location in October. The **final relocation** of all previous sites of the company to Münster will be completed **by the end of the year**.

In Münster, all divisions of the company OSARTIS will be united at one **central location**. So far, the different departments (e.g. administration, production, warehouse) were spread over the sites in Lagerstraße, Nordring and Benzstraße in Dieburg.

The shorter distances and closer coordination possibilities enable even **better communication and cooperation** between the different departments, which is of great importance to the further development and expansion of the company.

The move to Münster is another very important milestone in the company history for OSARTIS.

Besides the address there are no other changes of contact data.

Phone and fax numbers as well as email address remain the same:
